

**START**

**OUTPUT** Welcome to Julia's Calculator!

**OUTPUT** Unfortunately, I am under construction.

**OUTPUT** At this time, I can only add.

**OUTPUT** What is the first number of your expression?

**INPUT** num1

**OUTPUT** What do you want to add to that number?

**INPUT** num2

**CALCULATE** total = num1 + num2

**OUTPUT** Do you want to add anything else to this total? (y/n)

**INPUT** answer

**WHILE** answer is not y

**BEGIN**

**OUTPUT** What else do you want to add?

**INPUT** num

**CALCULATE** total = total + num

**OUTPUT** Do you want to add anything else?

**INPUT** answer

**END**

**OUTPUT** "Your total is" total "."

**OUTPUT** Thanks for using Julia's calculator!

**STOP**
